

Practical Hydraulic Formulae for the Distribution of Water Through Long Pipes; Also Notes on Water Supply Engineering

Filesize: 2.58 MB

Reviews

*A must buy book if you need to adding benefit. It is actually rally fascinating through studying time. Your way of life span will likely be transform as soon as you complete looking over this publication.
(Ms. Bernice Rolfson)*

PRACTICAL HYDRAULIC FORMULAE FOR THE DISTRIBUTION OF WATER THROUGH LONG PIPES; ALSO NOTES ON WATER SUPPLY ENGINEERING

To save **Practical Hydraulic Formulae for the Distribution of Water Through Long Pipes; Also Notes on Water Supply Engineering** PDF, make sure you access the button beneath and download the file or gain access to additional information that are related to PRACTICAL HYDRAULIC FORMULAE FOR THE DISTRIBUTION OF WATER THROUGH LONG PIPES; ALSO NOTES ON WATER SUPPLY ENGINEERING ebook.

Rarebooksclub.com, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1894 Excerpt: .the hydraulic grade line. Obviously, a vertical pipe discharging downward is a special case if such coincidence. Second.--If the water (Fig. 13), in its passage from the greater to the smaller pipe, passes through an opening in a thin diaphragm, Fig. 13. as in the case of a partially opened stop-cock, we have: $v_i s h = V$ in which V is the velocity in B, S the area of cross-section of B, and S the area of the opening in the diaphragm. Third.--When the flow is from one pipe to another of larger in which $V =$ velocity in small pipe, and $V =$ velocity in larger one. When the water passes from a pipe into a reservoir, as in the case lately considered, V becomes zero, and we have, as already established in that case: $r ft =$ to Another loss of head is that due to branches (Fig. 14). In Fig. 14. this case the water flowing from A, with a velocity V , is split at the junction, part passing on toward B, with a reduced velocity V , and part entering the branch and flowing toward C, with the velocity V . The loss of head occasioned by perturbations of the water at the junction has not been satisfactorily investigated. When the branch leaves the main at a right angle, this loss, as determined by a few incomplete experiments, is: $3 V h = V$ being the velocity in the branch. We have...
