

Studies on Crustacea of the Red Sea; With Notes Regarding Other Seas

By Otton Mikha Lovich Paul son

Rarebooksclub.com, United States, 2013. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can usually download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1875 edition. Excerpt: .in this case would have another function leading to their chitinization--then the forming of the longitudinal filaments in the cuticle would be satisfactorily explained. No one should, therefore, consider them canals, since under the most powerful magnification, no lumen can be observed in them. *T. cavimana* Var *cinctipes*. Tab, Vn. Fig, a. The frontal edge is denticulated and is separated by a small concavity from the beginning of the superciliar portion, which lacks spines. The extraorbital spine is small and the postorbital spine is lacking. The lateral edge is smooth. The chelipeds are unequal in size, the end of the internal edge of the meropodite does not form an outgrowth: this region is somewhat rounded and denticulated. At the base of the propodite of the large chelipeds, a small external hollow is found, as in *T. cavimana*, and the inferior edge of the propodite...
